As a member of the Center for Science in the Public Interest (CSPI), I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics. And that can leave physicians with no way to treat life-threatening bacterial infections in humans. That's why I support the petition filed by CSPI.

*In addition, please ban or
as label the use in beef &
dairy, bovine growth hormones
because it's safety is not 100%
sure and the cows get
such a lot given lots of
antibiotics which are dangerous.
See above*
